

FOOT DEFENDER

Defend What Matters

Diabetic foot ulcers (DFU's) require offloading to heal. Shoes are ineffective and can no longer be the standard of care. Foot Defender combines a clinically proven design that reduces force with game-changing aesthetics for greater compliance.

SUPERIOR FUNCTIONALITY

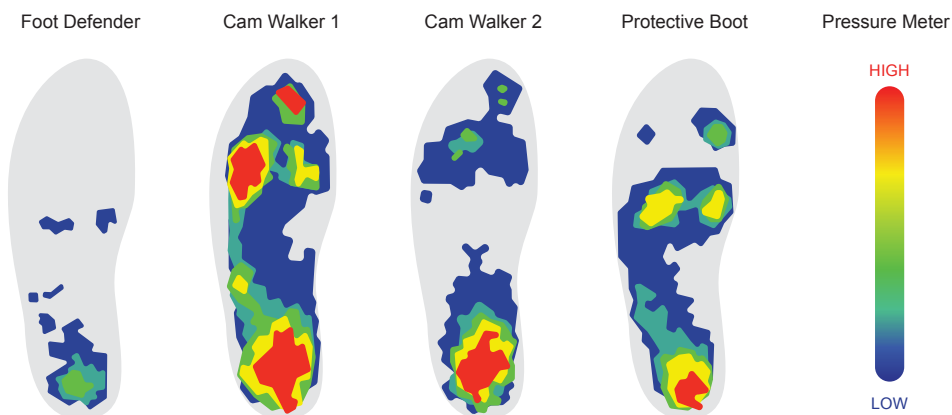

WALKING

Average maximum pressure
3 minutes on a treadmill at 1.5 mph and a 4% grade with a 200 lbs male with a US Size 12 foot

STANDING/STATIC

Average maximum pressure
200 lbs male with a size 12 shoe standing for 30 seconds.

Compare the Foot Defender to other boots commonly recommended to offload DFUs and the difference is clear.
