

## FOR IMMEDIATE RELEASE

### **Sanitis Announces Exclusive U.S. Master Distributor Partnership with MEDIZIP and Exclusive Sub-Distribution Agreement with VMD, Inc.**

**Austin, Texas – March 4, 2025** – Sanitis, a U.S. company specializing in medical solutions and healthcare innovations, is pleased to announce that it has entered into an exclusive agreement to act as the master distributor in the US and throughout North America for **MEDIZIP**, a next-generation advanced wound closure device that is transforming the way surgeries and emergency wound closures are handled. Additionally, Sanitis has selected **VMD, Inc.** as its exclusive sub-distributor to oversee the marketing and distribution of MEDIZIP products to military, Veterans Administration, and other federal health care institutions across the United States and North American markets. VMD is also a non-exclusive distributor of MEDIZIP outside of the federal healthcare systems.

Unlike other suture-free wound closures, **MEDIZIP provides a continuous closure along the entire wound length** rather than securing at multiple discrete points. This innovative design enhances the wound healing process by eliminating the need for needle puncture wounds that can permit the ingress of pathogens and minimizing scar formation. With MEDIZIP, surgeons, nurses, and first responders can close wounds quickly, allowing them to move on to the next patient more efficiently and save thousands on surgical theater costs.

“We are very pleased to introduce **MEDIZIP** to the American market,” said **Harry Jarbath, Founder of Sanitis**. “This wound closure device has already demonstrated remarkable effectiveness in Europe and Asia, and our mission is to make it widely available to healthcare professionals across the United States. Not only is it faster and easier to apply than traditional systems, but it also offers superior wound security and better patient outcomes which are invaluable assets for surgical teams, emergency physicians, and even school nurses.”

**Allen Beuershausen, Co-Founder of Sanitis**, added, “Our partnership with **VMD, Inc.** is a crucial step in ensuring that MEDIZIP reaches as many healthcare providers as possible. With their expertise in medical product marketing and distribution, we are confident that this collaboration will drive significant adoption of this groundbreaking technology.”

MEDIZIP is available in **12 cm and 24 cm lengths**, customizable to fit various wound sizes. Its versatility makes it ideal for a wide range of medical applications, from routine surgical procedures to emergency trauma care. By eliminating the need for sutures and staples, MEDIZIP enhances patient comfort, reduces procedure times, and improves overall wound healing outcomes.

**Kevin Caylor, CEO/President of VMD, Inc.**, expressed his enthusiasm for the partnership, stating, “We are incredibly excited to collaborate with Sanitis in bringing **MEDIZIP** to the North American market. This is a game-changing technology that will redefine wound closure practices, and we are eager to leverage our expertise in medical distribution to expand its reach.”

**Debra Grout, Partner at VMD, Inc.**, added, “The benefits of **MEDIZIP** are undeniable, and we believe it has the potential to become the gold standard in wound closure. VMD’s national sales team looks forward to working closely with Sanitis to ensure that medical professionals across the U.S. and beyond can access this innovative solution.”

This partnership marks a significant milestone for **Sanitis**, as the company continues to expand its portfolio of innovative medical products aimed at improving patient care and clinical efficiency. **MEDIZIP** is now available for purchase in the U.S. through **Sanitis, VMD, Inc., and their distribution partners**.

---
