

# The Missing Link In Your Supply Chain

LINK makes physical inventories smarter by matching UDI data to master inventory. SxanPro's mobile technology **captures expiration dates and lot numbers while matching each scan to your PAR locations for procedure areas.**

One physical inventory with LINK gives you the insights you need to make proactive decisions to eliminate wasted time, money and resources.

If you have to do a physical inventory, maximize the effort by getting actionable data to kick-start process improvements.

See the location, quantity and value of your inventory.

Identify gaps in inventory and make PAR location changes based on usage.

Stay ahead of product expiration with complete visibility into high-risk areas.

## LINK Turns Data Into Action

Average results from an OR supply core inventory using LINK:

**4%**

of PAR locations can be removed, preventing dollars lost due to reorders.

**8%**

of on-hand inventory will expire within 6 months, but LINK gives you visibility to where and when.

**100+**

expired items will be found and removed from shelves.

**\$40K**

in identified unused items can be recovered through vendor returns or selling to another facility.

# A Smarter Inventory Solution

Meet JUDI, the digital solution for medical supply inventory management.

JUDI is the only mobile app that **scans the manufacturer's barcode to capture product information and expiration date.**

This technology enables healthcare facilities to make data-driven decisions about their on-hand inventory. Use JUDI to improve current inventory processes, reducing labor hours and surfacing expired products.

## Improve the Procedural Supply Chain

- Suture and Endo Mechanical Management
- Consignment Inventory
- Overstock Supplies

Populate 10 data points with one scan of the UDI.

Locate expired products quickly, reducing the risk of human error.

Access data from a mobile app—no IT integration required.

# Leaner, Greener Inventory

MRKT is a **dedicated purchasing platform for supplies and instrumentation.**

Bring revenue back to your hospital for inventory that would remain unused until it expires on the shelf. Eliminate the waste that comes from overstocking and underutilizing medical supplies.

MRKT's large network makes it easy to get your inventory in front of multiple motivated buyers.

Identify overstock and export inventory lists from JUDI.

Sell in-date, short-dated and expired products to recover dollars quickly.

Move supplies and instrumentation other commerce sites won't accept.
