

Toileting is dangerous and expensive

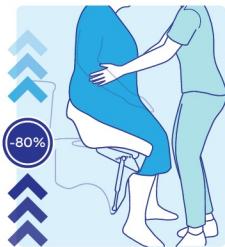

24% of all **healthcare providers** workers' compensation claims are from **overexertion**

80% of all **older adult falls** occur in the bathroom

SedMed Toilet Lift Assist
Lowers & Lifts up to
80% of user's bodyweight

✓ Supports 80% Body Weight

With Sedmed

No Sedmed

Rise Above Fall Risk

Reduce Falls by providing stability and support for those with decreased mobility and those prone to falling. Assist both raising and lowering users (up to 80% bodyweight).

Protect Staff: Cut Injury Costs

Staff get injured during patient/resident handling which leads to increased costs for workers' comp. claims and backfilled staff days.

Efficient Staffing for Transfers

Reduce staff needs for patient/resident toilet transfers. A two person assist can shift to a one person assist.

Self Powered:
No Electricity or Motor

5 Weight Resistance Settings:
Find the Optimal Level of Assist

Replaces The Existing Toilet Seat:
2 Bolts in 2 Minutes

Partners in Innovation

"Leveraging SedMeds innovative technology helped us to increase the quality of care and reduce falls for our residents. Additionally, it supported our nurses and caregiving team as a whole by moving someone from a Max Assist of 2 down to a Max Assist of 1, while offering residents the support they deserve."
