

Silver Hydrosol + Peroxide Wound Wash

- Breaks through biofilm
- No rinse formula Hypoallergenic
- No sulfur or damaging chemicals
- Promotes natural healing
- Kills bacteria and fungus in seconds*
- Over-The-Counter

KeriCleansz™ Topical Antiseptic skin and wound cleanser

This spray on Wound Wash helps reduce bacteria that cause infection and works to disrupt biofilms so that deep chronic wounds, ulcers, and burns can begin the healing process. Formulated with a powerful silver hydrosol antimicrobial that is enhanced with hydrogen peroxide, this potent wound cleanser has proven to disrupt biofilms in as little as 4 hours. A simple, no rinse, easy to use wound irrigation system with antimicrobial properties.

Ideal Applications:

- Burns, cuts, abrasions
- Infected wounds
- Diabetic wounds
- Pressure, skin ulcers
- Chronic and existing wounds with prolonged healing times

1oz bottle = 150 Sprays per bottle = 10 to 30 wounds treated

How to apply KeriCleansz™ wound wash

- Gently invert bottle to mix evenly
- Hold wound in horizontal position if possible
- Firmly press trigger and spray from above the wound
- Apply enough to fully cover area to cleanse or flush wound
- Repeat if needed

Ingredients: Water, silver hydrosol, hydrogen peroxide 1% (v/v)

*Testing completed by certified national labs

Patient had wound for 2.5 years with multiple hospitalizations and specialist interventions performed prior to KeriCleanz use.

No painful debridement was performed with use of KeriCleanz.

WHAT IS BIOFILM?

Difficult to eradicate colony of micro-organisms that coats the surface of more than 90% of open wounds.

CLINICAL IMPACT

Precipitates and perpetuates inflammation, which keeps wounds from healing, thereby significantly increasing pain, healing times and costs.

FINANCIAL IMPACT

Prolongs healing times, which increases hospitalizations, expensive specialty surgical interventions, and antibiotic use.

KERICLEANZ OUTCOMES

- Costs <\$2 per dressing change
- Reduces infections that lead to costly hospitalizations
- Decreases surgical interventions

Contact us today to learn how KeriCure Medical can help patients at skilled nursing facilities, home health agencies, hospice agencies, and wound care centers to reduce wound infections, help decrease dressing costs, and improve patient outcomes.
